# PRIYANKA ROKHADE

## SOFTWARE DEVELOPER

## SUMMARY

Proficient in developing robust and scalable web applications using React.js, Node.js, designing, implementing RESTful APIs, integrating third-party libraries, frontend technologies such as HTML5, CSS3, JavaScript, and expertise in responsive design principles. Proven ability to collaborate effectively in agile teams, deliver high-quality code on time, and adapt quickly to changing project requirements. Seeking opportunities to utilize my expertise and contribute to the success of innovative software projects.

## EXPERIENCE

### Freelancer

**Scobees** *Aug 2023 - Present*

- Developing a new learning experience platform to be used in schools.
- As a freelancer designing frontend using CSS, bootstrap and material UI.

### Software Developer

**SPAK Engineering, Bangalore** . *Feb 2022 - Jul 2023*

- Worked in MVB telemedicine live project to build components using **ReactJS and Redux.**
- Worked on user stories and built functionalities for admin, nurses and physicians and fixed frontend bugs like **API**, **validation**, **design layout**.
- Developed features to enhance user experience by using libraries like **toast, html-to-image, tooltip, jsPDF**.Optimized web pages for maximum efficiency and UI changes were done using **ReactJS, Html, CSS, JS and AntD**.
- Worked closely with senior developers and other team members to implement technical designs.

### Full Stack Developer trainee

- Built **Application tracking system** web application for HRs
- Built backend APIs using tools like **NodeJS, ExpressJS,** database was handled using MongoDB.
- Collaborated with frontend developers and designed the HR portal using **ReactJS, Bootstrap 5, HTML, CSS and JS**. Functionalities include adding new candidates, new jobs and processing the candidates for every round and updating their status for each round.
- As a team member everyday I had great discussion insights and also focused on delivering solutions to some fast-paced environments

## ACADEMIC PROJECTS

### Website development for Bookstore (Boomerang Books)

Tools: Python, Django framework, HTML, CSS, JavaScript, Bootstrap, SQLite3.
Designed & developed web application for bookstores where users can purchase and sell books.
